

INDEPENDENT RESEARCHERS' ASSOCIATION
for
ANOMALOUS PHENOMENA (IRAAP)

The **Independent Researchers' Association for Anomalous Phenomena (IRAAP)** was founded in April 1997 to investigate and research a variety of phenomena, including (but not limited to) Unidentified Flying Objects (UFOs), crop formations, cattle mutilations, and Bigfoot, and to communicate this information freely to interested parties.

Investigators and researchers retain their independent status; however, they may share their information with interested parties by communicating via the IRAAP website. IRAAP will relay the information by means of its online newsletter, *The Messenger*, and / or place the information on the web site at <http://iraap.org>.

Networking and communication are the keys to IRAAP's success. When submitting data, contributors must furnish personal information to IRAAP personnel for verification purposes, but they may then request complete or partial anonymity on the internet. As the need arises, we will also attempt to assist networking of researchers to aid them in their investigations.

Professionalism, scientific methodology and witness confidentiality must be maintained at all times.

If you wish to be part of IRAAP's network, we invite you to write to us and share your articles, investigations or research:

- Email: info@iraap.org
- Website: <http://www.iraap.org/contact.htm>
